

Steve Helinski

helinskis@gmail.com | North Huntingdon, PA | Portfolio: <https://helinsm.github.io/>

SUMMARY

Technical writer with 5+ years of experience producing IT and software documentation, work instructions, policies and procedures, and training materials using topic-based authoring, single-sourcing, and structured authoring standards. Comfortable working in agile/scrum environments with engineers, product owners, and SMEs. Master's in Professional Writing from Carnegie Mellon.

PROFESSIONAL EXPERIENCE

Technical Writer | ADP

Jan 2022 – Nov 2025

- Standardized unstructured notes, guides, and procedures into a unified knowledge base for HCM and payroll software, organizing process documentation across multiple business units.
- Refactored existing content into DITA using Ixiasoft CMS on Oxygen XML, applying topic-based authoring and task-oriented design.
- Collaborated with a team of authors to identify content reuse opportunities and improve consistency across product lines.
- Worked with product owners, developers, and SMEs through a comment-based review workflow on drafts, incorporating feedback to validate technical accuracy.
- Reviewed and edited peer documentation for format, style, voice, and clarity.
- Applied minimalism principles to reduce content volume without losing necessary detail.

Associate Technical Writer | University of Pittsburgh Medical Center (UPMC)

Mar 2021 – Jan 2022

- Documented software changes on an agile team supporting an application that managed patient electronic health records.
- Wrote and maintained release notes, what's new guides, and known issues content for each release.
- Contributed to the product manual alongside other writers, keeping content aligned with new features, enhancements, and bug fixes.
- Used MadCap Flare for single-source publishing in a multi-author environment.
- Participated in stand-ups, sprint planning, and retros; tracked work in Azure DevOps and wrote from user stories and SME input.

Director of Operations, Sales Infrastructure & Quality Systems | Greenhouse Winery

Nov 2025 – Present

Part owner of the business until its 2025 sale. Retained by the new owners to run operations.

- Manage supply chain, inventory, and operations across three locations, including vendor coordination, stock tracking, and procurement.
- Wrote SOPs, work instructions, and operational guides covering inventory, events, compliance, and wholesale processes.
- Designed and rolled out a hierarchical quality system (manual, policies, procedures, work instructions) to standardize operations across locations.
- Maintain the company website and produce marketing materials including event graphics, social posts, and customer-facing copy.

Technical Writer Intern | Optimus Technologies

Jun 2020 – Sept 2020

- Wrote a product manual for a biodiesel fuel system, working with engineers and SMEs to document specifications and system instructions.
- Produced marketing materials, whitepapers, and other informational content about the system and company.
